

The Fastest Request and Response Time in the Industry.

Sterling Testing Systems, Inc. is recognized as the premier pre-employment screening company in the United States.

DRUG TESTING

Sterling Testing Systems is affiliated with every major laboratory in the country including Medtox, Quest/SmithKline Beecham, and Labcorp and has access to over 3,300 collection sites throughout the country. Your company would be provided with Chain of Custody forms to be given to each applicant for them to take with them to the collection sites. Each applicant would be required to go to a collection that Sterling Testing Systems will provide you with for a urine drug screen.

All drug screens will pick up any drugs such as Marijuana, Cocaine, PCP, and Heroin along with Benzodiazepines, Barbiturates, Propoxyphene, and Codeine. Should the test come back positive, Sterling Testing Systems will perform all Medical Review work that may be necessary such as calling the applicant to find out if they are on medication, calling their doctor to confirm the medication, and calling the lab to make sure the medication provided would cause a positive reading for that drug.
